

Freestanding Hot and Cold Water Dispenser

This freestanding water dispenser provides convenient access to purified drinking water. It features hot and cold water taps, a stainless steel finish, and indicator lights.

Product Overview

Professional Hydration Solution

This freestanding water dispenser provides convenient access to both hot and cold purified drinking water. Featuring a durable stainless steel finish, this unit is engineered for reliability in high-traffic office environments or residential settings. It is equipped with intuitive indicator lights for power and temperature status, alongside an integrated drip tray for a cleaner workspace.
