

Freestanding Hot and Cold Water Dispenser with Filtration

This freestanding water dispenser provides both hot and cold filtered water. It features a top-loading bottle design, indicator lights, dispensing levers, and a built-in filtration system for clean and purified drinking water.

Product Overview

Professional Filtration and Dispensing

This freestanding water dispenser offers a seamless solution for both hot and cold purified water in any office or home environment. Engineered with a reliable top-loading bottle design, it integrates a high-performance built-in filtration system to ensure consistent water quality. The unit features durable construction with a sleek black and silver finish, complemented by a convenient base storage cabinet.
