

Freestanding Household Water Dispenser

This freestanding water dispenser is designed for household use. It features a digital display, dispensing area, and a bottom compartment for convenient access to both hot and cold water.

Product Overview

Advanced Household Water Purification

This freestanding water dispenser integrates comprehensive 5-stage RO filtration with an internal UV lamp to ensure superior water quality. Equipped with a microcomputer controller and a large VFD display, it offers convenient access to hot, cold, and room-temperature water. Designed for safety and efficiency, the unit includes compressor cooling, dry heating protection, and an integrated leakage alarm system.

Performance Specifications

Temperature Settings	Hot (e90), Cold (d10), Warm (Room Temp)
Cooling Technology	Compressor

Filtration and Safety

Safety Protections

- Dry heating protection
- Leakage alarm
- Leakage protection

Filtration Type	5-Stage Reverse Osmosis (RO) with integrated UV lamp
