

Freestanding Infrared Patio Heater

This freestanding patio heater features an infrared heating element and a stable base. Designed for outdoor use, it provides directional warmth for patios, decks, and other outdoor spaces.

Overview

Efficient Infrared Heating

This freestanding infrared patio heater offers an effective solution for extending the usability of outdoor areas during cooler weather. Utilizing advanced quartz tube heating technology, it provides instant warmth by heating objects and people directly rather than the surrounding air. Designed with a durable anodized extruded aluminum alloy mesh, this portable unit is suitable for both indoor and outdoor environments.

Technical Specifications

Heating Element Lifespan

5000 hours

Min Lifespan

8000 hours

Max Lifespan

Heating Technology	Quartz tube infrared
Construction Material	Anodized extruded aluminum alloy

Key Features

Operational Benefits

- Instant heat within seconds
- Silent operation
- Environment friendly
- Direct heating of objects and people
- High heating efficiency

Suitable Environments	Indoor, Outdoor
Portability	Yes
