

Freestanding Modular POS Terminal

This is a freestanding POS terminal and cash register housing. It features a modular design with distinct compartments for various components.

Product Overview

Professional POS Housing Solution

This freestanding modular POS terminal is engineered for high-volume retail environments. Featuring a robust metal construction, it provides a secure, organized housing for essential point-of-sale components, including screens, keypads, and cash dispensers. Its modular design ensures efficient component integration and simplified maintenance for busy retail operations.
