

Freestanding Vented Clothes Dryer for Home Use

This freestanding air vented dryer is designed for household use. The appliance efficiently dries clothes using a vented system, expelling moist air through a vent.

Overview

Efficient Home Drying Solution

This freestanding air-vented clothes dryer is designed for reliable and efficient performance in household environments. It features intuitive electrical programming with a clear LED indicator and advanced moisture sensing technology to ensure optimal drying results. With a 6kg capacity and convenient features like anti-crease functionality and a wide door opening, it offers a practical solution for daily laundry needs.
