

Freestanding Water Dispenser with Auto-Clean

This freestanding water dispenser is designed for home or office use. It features an AutoClean function that automatically sanitizes the water tank.

Product Overview

Professional Water Dispensation

The Freestanding Water Dispenser with AutoClean is a premium solution for both home and office environments, combining modern aesthetics with robust stainless steel construction. This unit delivers versatility through three distinct water temperature options—hot, cold, and room temperature—while prioritizing hygiene with its automated sanitization system. Engineered for high performance, it features an efficient compressor and user-centric controls to ensure a seamless experience for all users.
