

Freight Car for Rail Transport

This freight car facilitates the transportation of goods via railway. It is constructed with a durable body and undercarriage, designed for reliable performance.

Overview

Professional Rail Freight Solution

This specialized freight car is designed for efficient heavy-duty rail transport, specifically engineered for coal hauling operations. Featuring a robust, well-maintained chassis and high-visibility industrial markings, it offers reliability for intensive logistics applications. Its durable construction ensures longevity and performance in demanding rail transport environments.

Technical Specifications

Design Features

- Silver reinforced body
- Black heavy-duty undercarriage
- High-visibility yellow sectioning
- Detailed industrial safety markings

Car Identification

4390615

Transport Capacity

Coal Transportation, Heavy-Duty Freight
