Product Overview

Advanced Ozone Disinfection Technology

This 9kg front-loading washing machine features a unique ozone disinfection system that eliminates bacteria and odors without the need for water, ensuring clothes stay fresh and hygienic. Equipped with a high-efficiency BLDC variable frequency motor, it offers stable, quiet operation with significant energy savings. The machine is designed for user convenience, featuring a large 450mm window, ergonomic 180-degree door opening, and an intelligent control system with memory and safety functions.

Capacity & Performance

Dehydration Speed
