

Frosted GLS Light Bulb

This GLS bulb is designed for general lighting applications. Its frosted glass reduces glare, providing soft, ambient illumination.

Product Overview

General Lighting Solution

The Frosted GLS Light Bulb (Model TX001) is engineered for versatile general lighting applications across residential, commercial, and industrial environments. Its frosted glass envelope is specifically designed to diffuse light evenly, effectively minimizing glare and creating a soft, comfortable ambient illumination. Featuring a standard Edison screw base, this bulb ensures broad compatibility with a wide range of existing light fixtures.
