

Fruit and Vegetable Cleaning Washer

This fruit and vegetable washer uses purification technology to remove dirt and pesticides from produce. It features multiple wash cycles and a transparent window to monitor the cleaning process.

Product Overview

Advanced Produce Purification

This 10L automatic fruit and vegetable washing machine utilizes advanced hydroxyl water ion technology to effectively eliminate pesticide residues and harmful contaminants. Designed for convenience, it features a user-friendly interface and a humanized structure that simplifies operation for daily kitchen use. Beyond produce, the unit is versatile enough to handle tableware disinfection, making it an economical and essential tool for maintaining a hygienic home environment.

Technical Specifications

Capacity	10 L
Cleaning Technology	Hydroxyl Water Ion, Pesticide Degradation

Features

Core Functions

- Automatic fruit and vegetable washing
- Pesticide residue degradation
- Tableware disinfection

Usability

Easy to operate • Humanized structure design • Safe drainage function • Economical
