

Fruit and Vegetable Juice Extractor

This juice extractor efficiently extracts juice from various fruits and vegetables. It features durable construction, multiple attachments, and easy-to-clean components.

Overview

Versatile Juice Extraction System

This high-performance juice extractor is designed for efficient processing of fruits and vegetables, featuring a robust stainless steel housing for durability. The system includes multiple attachments, such as a blending jar, food chopper, and dry mill, offering a comprehensive solution for various kitchen tasks. With a built-in safety system and anti-slip feet, it provides a stable and secure operation for both home and small commercial environments.
