

Fruit Protection Bag Making Machine

This machine is designed for the automated production of fruit protection bags. It features high efficiency, precision, full automation and low power consumption.

Overview

High-Efficiency Fruit Bag Production

This fully automatic bag making machine is engineered for high precision and efficiency in the production of agricultural fruit protection bags. It is capable of manufacturing a wide range of styles, including single-layer, double-solid, and flat grape bags, as well as convenient packaging for supermarket produce. With low power consumption and an integrated automatic wire-setting feature, it provides a reliable solution for large-scale packaging needs.

Performance Metrics

Production Speed

320 bags/min

Bags per Minute

Technical Specifications

Product Model	YSG-15
Rated Power	1.5 kw
Rated Voltage	220/380V
Net Weight	2000 kgs
Machine Dimensions	5106 x 1218 x 1800 mm

Operational Requirements

Operators Required	2
Thread Disposal	Automatically setting wire

Capabilities

Bag Size Range

Dimension	Range
Width	150-330mm
Length	150-450mm

Compatible Bag Types	Single layer, Double solid, Single solid, Flat grape bag, With handle, Without handle, Supermarket fruit/veg pack
