

FTP CAT5E Ethernet Cable

This is a high-performance FTP CAT5E cable designed for data transmission in networking applications. It features twisted pair conductors, shielded with foil, and a durable outer jacket, supporting Gigabit Ethernet speeds and suitable for indoor installations.

Product Overview

High-Performance Networking Solution

This FTP CAT5E Ethernet cable is engineered for reliable data transmission in professional networking environments. Featuring a 24AWG bare copper conductor and Al/Pet foil shielding, it offers excellent signal integrity and robust protection against EMI/RFI interference. Designed for Gigabit Ethernet speeds, this durable cable is ideal for indoor installations requiring minimal crosstalk and consistent performance.

Technical Specifications

Conductor Size	0.51 mm
AWG Rating	24
Conductor Material	Bare copper
Insulation Material	HDPE
Insulation Thickness	0.97 mm
Cores/Pairs	8 Cores / 4 Pairs

Construction & Shielding

Shielding	Al/Pet Foil
Drain Wire	0.4 mm
Sheath Options	PVC, PE, LSZH
Outer Diameter	6.2 mm
