

FTP CAT6 Ethernet Cable

This FTP CAT6 cable is designed for reliable data transmission in networking applications. It features twisted pairs with shielding to minimize interference and ensure optimal signal integrity.

Product Overview

High-Performance FTP CAT6 Connectivity

This FTP CAT6 Ethernet cable is engineered to deliver reliable, high-speed data transmission across various networking environments. Featuring advanced twisted pair construction with shielding, it effectively minimizes electromagnetic interference to ensure signal integrity. It is an ideal solution for professionals seeking a balance of cost-effectiveness and high-quality performance for Ethernet, Fast Ethernet, and Gigabit networking applications.

Technical Specifications

Shielding

FTP (Foiled Twisted Pair)

Key Features

- High-performance data transmission
- Minimized signal interference
- Durable construction
- Suitable for residential and commercial use

Cable Type

FTP CAT6

Supported Networks

Ethernet, Fast Ethernet, Gigabit Ethernet
