

FTP Shielded Twisted Pair Enhanced Category 5 Cable

This is a high-performance FTP (Foiled Twisted Pair) cable designed for enhanced category 5 (Cat5e) applications. The cable features four twisted pairs of conductors, providing excellent signal transmission characteristics.

Product Overview

High-Performance Networking Solution

This FTP (Foiled Twisted Pair) cable is engineered for enhanced Category 5 (Cat5e) applications, delivering robust signal transmission in demanding environments. Featuring four twisted pairs of conductors and comprehensive shielding, it provides superior protection against electromagnetic and radio frequency interference. It is an ideal choice for networking, data centers, and industrial automation where signal integrity is critical.

Technical Specifications

Shielding

Foiled Shielded • EMI Protected • RFI Protected

Cable Type

FTP (Foiled Twisted Pair) Enhanced Category 5 (Cat5e)

Conductor Configuration

4 Twisted Pairs

Performance & Compatibility

Supported Protocols

Gigabit Ethernet, High-speed Data

Application

Primary Applications

- Networking
- Data Centers
- Industrial Automation
