

FTTH FTTB CATV Network Hardware

These network hardware components support FTTH, FTTB, and CATV applications. They are essential for fiber optic and cable television network infrastructure.

Overview

Versatile Network Infrastructure Components

This collection of network hardware components is designed to support diverse telecommunications infrastructure needs, including FTTH, FTTB, and CATV triple-play applications. The hardware ensures reliable connectivity and signal distribution across various network architectures. These essential components provide the flexibility required for modern fiber optic and cable television deployments.

Applications

Supported Network Types

FTTH, FTTB, CATV

Hardware Modules

FTTH Modules

- OBU-101
- OBU-200A
- OBU-404
- OBU-200B

FTTB Modules

- OBU-1001B

CATV Triple Play Modules

- OBU-300A
- OBU-404
