

Fuel Dispenser

This fuel dispenser provides precise measurement and controlled dispensing of fuel. It features a digital display for volume and price, along with a nozzle and control panel.

Product Overview

Industrial Fuel Dispenser System

This fuel dispenser is designed for high-efficiency fuel management and accurate measurement in professional settings. Featuring an integrated digital display for both volume and pricing, it provides real-time transaction visibility for users. The robust construction includes standardized mounting points and ergonomic hose integration to ensure reliable performance and ease of installation.

Technical Specifications

Display Capabilities
