

Fuel Dispenser Unit with Display

This fuel dispenser unit is designed for dispensing gasoline or other liquid fuels. The unit features a display screen showing sale, liter, and price information and includes a nozzle and hose for fuel delivery.

Product Overview

Industrial Fuel Dispenser Unit

This fuel dispenser unit is engineered for reliable performance in demanding environments such as commercial gas stations. It features a clear, intuitive display screen that provides real-time information on sale volume, total liters, and unit pricing to both operators and customers. Built with a robust frame and high-quality paneling, this unit is designed to withstand continuous outdoor exposure while ensuring precise fuel delivery.
