

Fuel Dispenser Unit with Electronic Display

This fuel dispenser unit is equipped with an electronic display for accurate readings. It includes a nozzle and hose, making it suitable for gasoline or diesel fuel dispensing applications.

Overview

Professional Fuel Dispensing Solution

This fuel dispenser unit is engineered for precise and reliable fuel management in commercial applications. Equipped with an integrated electronic display, it provides clear readouts for sale amount, volume, and unit pricing. Its robust design is fully compatible with both gasoline and diesel, making it an essential choice for industrial or commercial refueling stations.

Technical Specifications

Display Features

- Real-time sale tracking
- Liter volume indicator
- Digital price display

Dimensional and Internal Components

Component Category	Reference
External Dimensions	a, b, c
Internal Mechanism	N, M, P

Fuel Compatibility	Gasoline, Diesel
