

Fuel Dispenser with Meter and Automatic Nozzle

This fuel dispenser includes a meter and automatic nozzle. It also features an explosion-proof motor and secure hose connections.

Overview

Professional Fuel Dispensing Solution

This fuel dispenser is engineered for high-performance and reliable fuel transfer in professional settings. It features robust, explosion-proof motor configurations and high-precision metering systems to ensure accurate delivery and safety. With options for both gear and vane pump setups, this unit is adaptable to various operational requirements, making it an ideal choice for service stations and industrial fuel management.

Core Components

Standard Configuration

| Component | Specification |
|-----------|-------------------|
| Meter | MJ-85S |
| Pump | ZCB-90 Gear Pump |
| Nozzle | TD-20A Automatic |
| Hose | 1 inch, 4m length |

| | |
|------------------------|-----------------------|
| Standard Motor Voltage | AC380V \pm 20% 50HZ |
|------------------------|-----------------------|

Alternative Configurations

Available Pump & Meter Combinations

- MJ-65S Meter + ZYB-50 Vane Pump
- MJ-55S Meter + ZCH-50 Gear Pump
- MJ-85S Meter + QYB-240R Submersible Pump

| | |
|---------------------------|-----------------------|
| Alternative Motor Voltage | AC220V \pm 20% 50HZ |
|---------------------------|-----------------------|

| | |
|--------------------|--------------------------|
| Alternative Nozzle | XIDE-80 Automatic Nozzle |
|--------------------|--------------------------|

Safety & Features

| | |
|-----------------------------|--|
| Safety & Auxiliary Features | Breakaway Valve, Swivel Connector, Explosion-Proof Motor |
