Product Overview

Professional Fuel Dispensing Solutions

This range of fuel dispensing nozzles includes both automatic and manual models designed for diverse industrial and commercial applications. Engineered for reliability and consistent performance, these nozzles support a wide variety of flow rates and thread configurations to suit specific system requirements. With features like 360-degree swivel joints and optional hold-open racks, these units provide operators with enhanced control and convenience during fuel transfer.

Technical Specifications

Model Specifications

Model Series	Inlet Sizes	Flow Range	Nominal Pressure
