

Fuel Dispensing Unit with Dual Nozzles

This fuel dispensing unit allows for simultaneous or separate fuel delivery with its two nozzles. It features a display showing volume, price per unit, and total sale amount for accurate fuel measurement.

Product Overview

Dual-Nozzle Fuel Dispensing Solution

This high-performance fuel dispensing unit is engineered for reliability and precision in demanding fueling station environments. Featuring a dual-nozzle configuration, the unit allows for efficient fuel delivery, enabling simultaneous operation to maximize throughput. The integrated digital display system ensures transparent transactions by clearly showing volume, unit price, and total sale amount, making it an ideal choice for professional retail fuel operations.

Technical Details

Model Number	JDK50J222
Number of Nozzles	2
Capabilities	Dual Delivery, Digital Metering, Fuel Station Grade
