

Fuel Injection Pump Assembly PS8500

This is a fuel injection pump assembly. It provides high-pressure fuel delivery for engine systems.

Product Overview

High-Performance Fuel Injection Solution

The PS8500 Fuel Injection Pump Assembly is a critical component designed for heavy-duty engine systems. This high-pressure oil pump ensures precise fuel delivery, optimizing combustion efficiency and overall engine reliability. Engineered for durability, it is a direct replacement part that meets rigorous operational standards for heavy-duty truck applications.

Technical Specifications

Model Number	28-BHM6P120YAY170
Drawing Number	VG1560080023
Order Number	CB5P828
Pump Type	High Pressure Oil Pump (CB6P828)
Serial Number	13070831630R

Compatibility & Features

Compatible Systems	Heavy Duty Truck, Injection System, Engine Parts
