

Fuel Injection Valve 9308-625C

This fuel injection valve is engineered for optimal fuel delivery, ensuring efficient combustion and reduced emissions. It features a robust construction for durability and long-lasting performance in demanding automotive environments.

Product Overview

High-Precision Injection Valve

This fuel injection valve is engineered for optimal fuel delivery in modern diesel engines, ensuring efficient combustion and reduced emissions. It features a robust construction designed for durability and long-lasting performance in demanding automotive environments. With precise calibration, this component is critical for maintaining consistent engine performance and fuel economy across compatible injection systems.

Technical Details

Compatibility & Reference Codes

- 26012013
- 28284275
- 08710
- 01679

Model Number	9308-625C
Production Date	23/01/14

Performance Features

Key Benefits

Optimal Fuel Delivery • Efficient Combustion • Reduced Emissions • Wear Resistant

Construction Quality	High-Precision, Robust, Durable
