

Fuel Injector

This high-performance fuel injector is designed for optimized fuel delivery and combustion efficiency. The injector features a precision-engineered nozzle for accurate spray patterns, ensuring consistent engine performance and reduced emissions.

Overview

High-Performance Fuel Delivery

This high-performance fuel injector is designed for optimized fuel delivery and combustion efficiency in common rail systems. It features a precision-engineered nozzle for accurate spray patterns, ensuring consistent engine performance and reduced emissions. Constructed from durable materials to withstand high pressures and temperatures, it offers reliable operation and extended service life.

Identification

Compatible Part Numbers

23670-0L050, 23670-30050, 095000-5600, 095000-7060

Technical Specifications

Injection System

Common Rail

Key Features

- Precision-engineered nozzle
- Accurate spray patterns
- High pressure resistance
- High temperature durability

Application

Application Scope

Suitable for both original equipment (OE) and aftermarket applications across various engine types.
