

Fuel Injector for 6HK1 Engine

This fuel injector is designed for use in ISUZU ZX330 vehicles. It ensures optimal performance and reliability for the engine's fuel system.

Product Overview

Precision Fuel Injection Component

This fuel injector is engineered specifically for 6HK1 engines, ensuring optimal fuel delivery for improved engine efficiency and reliability. Designed to meet strict performance standards, this component is essential for maintaining precise combustion cycles in heavy-duty machinery. It is compatible with a wide range of engine configurations and industrial applications.

Compatibility

Compatible Engine Models	4HK1, 6HK1, 4HJ1, 6WG1
Equipment Compatibility	ISUZU, HITACHI, JCB
