

Fuel Injector Nozzle for Diesel Engines

This fuel injector nozzle is designed for use in diesel engines. It delivers precise fuel delivery for efficient engine operation.

Product Overview

High-Performance Diesel Fuel Injector

This fuel injector nozzle is engineered for optimal fuel delivery and superior engine efficiency in demanding heavy-duty applications. Designed with precision-machined components and advanced spray technology, it ensures accurate fuel atomization for enhanced combustion and reduced emissions. This robust component is a direct replacement for worn or damaged units, helping to restore engine performance and improve overall fuel economy.

Technical Specifications

Part Number	0445120066
Primary Application	Construction Machinery / Excavators
Packaging	1 Piece

Performance Features

Key Benefits

- Precise fuel delivery
- Enhanced engine combustion
- Reduced emissions
- Improved fuel economy
- Durable construction for heavy-duty environments
