Product Overview

Industrial Mounting Solution

This mounting bracket, clamp, and cradle holder is designed for the secure integration of fuel oil pumps and filters in drum-mounted systems. It features a robust 60mm clamp design ensuring stability and proper alignment while minimizing vibration during operation. Engineered for demanding industrial environments, this component is suitable for use in workshops, service stations, and fleet maintenance facilities across various sectors including mining, construction, and agriculture.

Technical Specifications

Tube Diameter	34 mm
Application Pump Ratio	3:1
Bung Adaptor	2 inch BSP (Height-adjustable)
Clamp Size	60 mm

Application Areas

Suitable Industries

- Workshops
- Service Stations
- Fleet Maintenance
- Mining
- Agriculture
- Armed Forces
- Construction
- Trains

System Compatibility	3:1 Oil Pump Brackets, Drum-Mounted Systems, Non-corrosive Fluid Transfer
