

Fuel Pump Strainer with Filter Bag

This fuel pump strainer is designed to filter gasoline and other fuels, ensuring clean fuel delivery to the engine. It features a fine mesh filter bag and a yellow inlet nozzle for secure connection to the fuel pump assembly.

Product Overview

High-Efficiency Fuel Filtration

This fuel pump strainer is engineered to ensure clean fuel delivery to your engine by effectively filtering gasoline and other fuel types. Featuring a fine mesh filter bag and a durable construction, it protects the fuel system from contaminants and debris. It is designed with a secure yellow inlet nozzle for reliable connection to the fuel pump assembly, making it an ideal choice for both automotive and industrial applications.

Technical Specifications

Component Type	Fuel Pump Strainer with Filter Bag
Filter Media	Fine Mesh
Inlet Connection	Yellow Inlet Nozzle

Applications

Compatible Fluids

- Gasoline
- General Fuels

Suitable Industries	Automotive, Industrial
