

Fuel Shutoff Solenoid Valve

This solenoid valve is designed to reliably shut off fuel in automotive applications. It features a robust metal construction and is available with various terminal types, including blade, connector, and threaded stud options.

Product Overview

Reliable Fuel Shutoff Solution

This flameout solenoid valve is designed for automotive applications requiring dependable fuel shutoff functionality. Engineered with a robust metal body, it ensures durability and consistent performance in demanding environments. Available in both 12V and 24V configurations, this component offers versatility for various system requirements.

Technical Specifications

Voltage	12V, 24V
Type	Flameout Solenoid Valve

Commercial Terms

Warranty	1 Year Warranty
Availability	In Stock - Ready for Fast Delivery
