

Fuel Transfer Pump Unit with Digital Display

This self-contained fuel transfer pump unit is designed for dispensing gasoline or other fuels. It features a robust pump mechanism, a digital display for accurate measurement, and a flexible hose with a dispensing nozzle.

Product Overview

Professional Fuel Transfer Solution

This self-contained fuel transfer pump unit is engineered for precise and reliable dispensing of gasoline and other fuels. Featuring a robust, protective enclosure and an integrated digital display, it ensures accurate measurement of dispensed volumes for every transaction. Designed for efficiency and durability, this electrically powered unit is an ideal solution for industrial or commercial applications requiring controlled fuel management.

Technical Specifications

Included Components

- Robust pump mechanism
- Protective enclosure
- Digital measurement display
- Flexible dispensing hose
- Dispensing nozzle

Model Identifier

CUBE 56

Display Capabilities

Digital Display, Litre Counter, Totalizer, Resettable

Performance Metrics

Key Performance Metrics

56 L/min
