

Full-Automatic Washing Machine Motor

This motor is designed for full-automatic washing machines. It features robust construction for durability and efficient operation with 220-240V at 50/60Hz.

Product Overview

High-Performance Washing Solution

This high-performance motor is specifically engineered for full-automatic washing machines, ensuring reliable and efficient operation. Its robust construction is designed to withstand the demands of frequent use, making it a dependable component for various washing machine models. The unit supports standard 220-240V power supplies, providing consistent performance across different electrical environments.

Technical Specifications

Rated Voltage	220-240V
Frequency	50 Hz
Model Identifier	YXQ-150TAL
Compatibility	Full-Automatic Washing Machines

Key Features

Performance Highlights

240 V

Max Voltage

60 Hz
