

Full HD VGA and Audio Extender

This device supports Full HD 1080P and 1920X1200@60Hz resolutions, extending signals up to 300m. It requires no driver or software installation, offering plug-and-play functionality.

Product Overview

High-Performance VGA and Audio Extension

This advanced VGA and audio extender allows for the seamless transmission of high-definition video and audio signals over distances up to 300 meters using Cat5e/6 cabling. Designed for professional environments, it supports resolutions up to 1920x1200 at 60Hz, ensuring crisp and clear visual output without the need for additional software or drivers. The plug-and-play functionality, combined with automatic R.G.B. tuning and de-skewing, makes it an ideal solution for digital signage, remote monitoring, and large-scale presentation setups.

Technical Specifications

Maximum Resolution	1920 x 1200 @ 60Hz
Maximum Extension Distance	300 m
Supported Signals	VGA, Audio
Compatible Cabling	Cat5e, Cat6

Features

Key Features

- Plug & Play installation (no software/drivers required)
- Automatic R.G.B. tuning and de-skew function
- Local VGA and audio monitoring on transmitter
- EDID default and refresh learning
- Hot plug & play support

Manufacturing Origin

Made in Taiwan
