

Full Suspension Alloy Mountain Bike

This full suspension mountain bike is designed for trail riding and all-mountain adventures. Its alloy frame provides a balance of durability and lightweight performance, while the front suspension fork and rear shock ensure control on rough terrain.

Overview

High-Performance Trail Bike

This full-suspension mountain bike is engineered for versatility and control on demanding trails. Built with a robust alloy frame and advanced dual-suspension technology, it provides 150mm of travel to absorb impacts and maintain traction on rough terrain. The drivetrain offers a wide gear range for steep climbs and fast descents, while hydraulic disc brakes ensure reliable stopping power in diverse conditions.

Frame & Suspension

Suspension Travel
