

Full Suspension Mountain Bicycle

The full suspension mountain bicycle is designed for comfortable riding on rough terrain. Its full suspension system absorbs bumps and shocks for enhanced control and stability.

Overview

Designed for Off-Road Performance

The STORM 3.0 is a 26-inch downhill mountain bicycle engineered for comfort and stability on rough terrain. Featuring a full suspension system and responsive mechanical disc brakes, it ensures excellent control for recreational riders. With its 21-speed gear set and durable double-wall alloy rims, this bike offers a versatile and reliable experience for trail exploration.
