

Full Suspension Mountain Bicycle

This mountain bicycle is equipped with a full suspension frame and front suspension fork. It also features knobby tires, multiple gears, and hand-operated brakes for varied terrain.

Overview

Full Suspension Mountain Bicycle

This mountain bicycle is engineered for versatility and comfort across varied terrain. Featuring a robust full suspension frame and a high-performance front suspension fork, it effectively absorbs shocks for a smoother ride. Designed with knobby tires and a multi-gear drivetrain, this bike provides the traction and control necessary for challenging off-road conditions.
