

Full Suspension Mountain Bicycle with Disc Brakes

This full suspension mountain bicycle features a complex suspension system with a rear shock absorber and front suspension forks. It is equipped with disc brakes, a multi-speed drivetrain, and platform pedals.

Overview

High-Performance Mountain Bike

This full suspension mountain bicycle is engineered for rugged terrain and demanding trails. It features a robust frame design equipped with both front suspension forks and a rear shock absorber to ensure maximum comfort and control on uneven surfaces. With reliable disc brakes and high-traction tires, this bike is built to provide safety and performance for serious riders.
