

Full Suspension Mountain Bike with Disc Brakes

This full suspension mountain bike features a dual suspension system for enhanced shock absorption and control on rough terrain. It is equipped with a multi-speed drivetrain and disc brakes for reliable stopping power.

Product Overview

Built for Performance

This full-suspension mountain bike is engineered for high-performance off-road adventures and demanding trail riding. Featuring a lightweight frame and advanced shock absorption, it offers superior control and comfort on uneven terrain. Reliable disc brakes and a multi-speed drivetrain ensure safety and efficiency during high-intensity rides.

Technical Specifications

Suspension System	Full suspension
