

Full Suspension Mountain Bike

This full suspension mountain bike is designed for off-road use and provides a smooth ride on rough terrain. Equipped with multiple gears, the bike is suitable for tackling various inclines and descents.

Overview

Built for Rugged Terrain

The STREAM 3.0 is a robust downhill mountain bike designed to deliver a smooth and controlled experience on challenging off-road paths. Featuring a full-suspension system that effectively absorbs shocks and vibrations, it ensures rider comfort during descents and bumpy rides. With its durable high-tensile steel frame and versatile 21-speed gear system, this bike provides the performance needed to tackle a variety of inclines and terrain types.
