

# Full Synthetic High-Performance Gasoline Engine Oil

This full synthetic engine oil is suitable for high-end imported and domestic vehicles, racing cars, and SUVs. It meets European, American, Japanese, and Korean standards, providing an extraordinary driving experience for new high-tech engines.

## Product Overview

### High-Performance Synthetic Engine Oil

This full synthetic engine oil is engineered for high-performance gasoline engines operating under extreme conditions. Utilizing advanced active magnetic technology, it forms a protective magnetic oil film that adheres to engine surfaces for superior wear resistance. Designed to meet leading international standards, this lubricant ensures optimal engine protection and enhanced driving performance.

## Technical Specifications

Viscosity Grade	5W/40
Performance Standards	API SN, ACEA A5

## Packaging & Availability

### Available Volumes

- 1 Liter
- 4 Liters

## Key Features

### Performance Highlights

<b>100 %</b> Wear Resistance	<b>1 High</b> Protection Level
