

Fused Spur Connection Unit with Metal Enclosure

This fused spur connection unit is designed for industrial and commercial applications. Enclosed in a metal case, it provides mechanical strength and electrical shielding for connecting fixed appliances to the mains supply.

Product Overview

Industrial Fused Spur Connection Unit

This robust fused spur connection unit is engineered for reliable power distribution in demanding industrial and commercial environments. Housed in a durable metal enclosure, it provides superior mechanical strength and essential electrical shielding for fixed appliance connections. The unit features a high-visibility on/off switch mechanism and an integrated fuse holder to ensure consistent circuit protection and operational safety.

Technical Specifications

Key Features

- Integrated fuse holder
- Clear on/off switch indication
- Red power indicator light
- Durable metal enclosure

Mounting Style	Surface Mounted
Enclosure Material	Metal
Applications	Industrial, Commercial, Fixed Appliance Connection
