

FV Series Conveyor Chain

Conveyor chains in the FV series are designed for a variety of conveying applications. These chains provide reliable performance in material handling systems.

Product Overview

FV Series Conveyor Chains

The FV series conveyor chains are designed for industrial applications requiring high precision and durability. These chains are engineered to meet rigorous performance standards, offering high strength and reliable operation in demanding environments. Manufactured with a focus on environmental sustainability, they provide an efficient solution for various power transmission and material handling needs.

Manufacturing & Capacity

Annual Production Capacity	20000000 meters
Production Facility Area	200100 sqm
Skilled Employees	3100

Certifications & Standards

Certifications	ISO9001, ISO14001, ISO16969, AAA, API
----------------	---------------------------------------

Product Capabilities

Available Types

- Standard chains
- A series chains
- B series chains
- Roller chains
- Driving chains
- Conveyor chains
- Dragging chains
- Agricultural chains
- Stainless steel chains
