

# FY50 Diesel Hydraulic Dump Truck

This FY50 dump truck is designed for transporting materials on construction sites. It features a hydraulic tipping mechanism for quick unloading.

## Product Overview

### Robust Material Transport

The FY50 diesel hydraulic dump truck is a heavy-duty construction machine engineered for efficient material transport on demanding job sites. Featuring a powerful hydraulic tipping mechanism, it enables rapid and precise unloading of bulk materials like soil, gravel, and construction debris. With its durable chassis and rugged tires, this dumper is designed to maintain reliable performance and maneuverability in challenging environments.

## Technical Specifications

Model	FY50
Power Source	Diesel

## Features

Key Features	Hydraulic Tipping, Construction Grade, Heavy-Duty Chassis, All-Terrain Capability
--------------	---

## Applications

### Suitable Materials

- Soil
- Gravel
- Construction Debris
