

# G70K Railway Oil Tanker Car

This railway oil tanker is designed for the transportation of various liquid commodities, mainly petroleum products. The tanker car has a cylindrical tank mounted on a rail car chassis and is equipped with safety valves, filling ports, and thermal insulation.

## Overview

### G70K Railway Oil Tanker Car

The G70K Railway Oil Tanker is a specialized rail car engineered for the safe and efficient transport of liquid commodities, primarily petroleum products. It features a robust cylindrical tank mounted on a rail chassis, equipped with essential safety valves and discharge ports. Designed to meet strict railway industry standards, this tanker ensures secure handling of flammable and hazardous liquids during transit.

## Technical Specifications

### Safety Equipment

- Safety valves
- Secure filling ports
- Discharge ports
- Thermal insulation

<b>Model Designation</b>	G70K
<b>Primary Application</b>	Petroleum Transport, Hazardous Liquid Transport, Railway Logistics

## Identification

### Identification Markings

Identifier Type	Value
Model	G70K
Serial/Unit Number	6546
Fleet Number	6283052
