

G80 Alloy Steel Eye Hoist Hook

This eye hoist hook is constructed from forged alloy steel for strength and durability in lifting applications. It includes a safety latch to prevent load disengagement and an eye for easy connection to lifting devices.

Product Overview

High-Strength Lifting Solution

The G80 Alloy Steel Eye Hoist Hook is a robust lifting component engineered for heavy-duty industrial and agricultural applications. Constructed from high-strength forged alloy steel, it offers superior durability and reliability for critical lifting operations. Featuring an integrated eye design for seamless connection to chains and wire ropes, this hook includes a safety latch to prevent accidental load disengagement.

Technical Specifications

Surface Process

- Galvanized
- Ungalvanized
- Spray painting

Certification

ISO9001: 2000

Material

Alloy Steel, Stainless Steel, EN1766

Application Details

Component Type

Hook

Compatible Sling

Wire Rope

Condition

New
