

# G80 Alloy Steel Load Chain

This G80 load chain is designed for lifting and rigging applications. Constructed from alloy steel, it provides durability and reliability in demanding industrial and construction environments.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance G80 Load Chain

This G80 alloy steel load chain is engineered for demanding lifting and rigging applications in industrial and construction environments. Manufactured from high-quality 20Mn2 alloy steel, it offers exceptional durability, wear resistance, and reliable load-bearing performance. Designed for compatibility with electric hoists and heavy lifting equipment, this chain provides a safe and secure solution for your material handling needs.

## Technical Specifications

### Surface Treatments

Self-color • Polishing • Blackened • Hot-dip galvanized

### Material

High quality alloy steel 20Mn2

### Quality Grades

G80, G100
