

Galvanized Malleable Wire Rope Clips DIN 741

These galvanized clips are manufactured from malleable steel. They are designed for creating secure loops and terminations in wire rope applications.

Product Overview

Reliable Wire Rope Rigging

These malleable wire rope clips are manufactured according to DIN 741 standards, designed for creating secure loops and terminations in various wire rope applications. The malleable construction ensures durability and resistance to deformation under load, making them suitable for essential lifting and rigging tasks. With options for galvanized or self-colored finishes and steel or stainless steel materials, these clips offer versatility for both indoor and outdoor environments.

Technical Specifications

Finishes

Galvanized • Self-colour

Standard	DIN 741
Size Range	6mm to 50mm
Material Options	Steel, Stainless Steel
