

Galvanized Pipe Clamp with Screw

This galvanized pipe clamp is designed to secure pipes to surfaces. It features a split ring with bolted connections for easy installation and adjustment.

Product Overview

Reliable Pipe Support Solution

This galvanized pipe clamp with screw is engineered for secure and stable attachment of pipes to various mounting surfaces. Featuring a robust split-ring design, it allows for straightforward installation and precise adjustment during setup. The included threaded screw provides versatile mounting options, making it an essential component for professional piping systems.

Technical Specifications

Material Finish

Galvanized

Design Features

Split Ring, Bolted Connection, Adjustable

Mounting Method

Threaded screw

Primary Application

Securing pipes to surfaces
