

Galvanized Steel Electrical Boxes and Accessories

These stamped steel electrical boxes and accessories are designed for residential and commercial wiring applications. They feature pre-punched knockouts and galvanized steel construction for corrosion resistance, suitable for concealed wiring.

Product Overview

Professional Electrical Enclosure Solutions

These stamped steel electrical boxes and accessories provide a robust, code-compliant foundation for residential and commercial wiring projects. Engineered for durability, the galvanized steel construction offers excellent corrosion resistance for long-term reliability. Featuring precision-punched knockouts, they ensure efficient cable routing and simplified installation in walls, ceilings, and floors.

Material and Build

Material	Galvanized Steel
Features	Corrosion Resistant, Stamped Steel, Pre-punched Knockouts

Application

Suitable Installation Environments

- Residential wiring
- Commercial wiring
- Wall mounting
- Ceiling mounting
- Floor mounting
